I worked from the USEPA\_APS-FCPP\_010715.xls file. I didn't think those were the same data as in the .txt file. Could you please resend the .txt file?

Thanks Gerry for extracting from the .txt file that I sent you. Since you reworked the data, want to be sure you got the same sample ID. Here is the list of San Juan sites that were sampled under NRSA. Data from these sites (see lat longs below)? I had HQ verify sites from NRSA data set. I also verified that we only did water chemistry. Janet

**Subject:** Selected pre-event data SJR

I have done some sorting & editing of the USEPA\_APS-FCPP\_010715 file supplied by Janet. In the attached spreadsheet, the "SJR - GKM metals & selected WQ" tab contains data from San Juan River only stations (I think I identified them correctly – please check). I omitted data on pharmaceuticals, radiologicals, weather and various water quality standards. I also added columns to convert mg/l data to ug/L units (see highlighted "R9 Edit" columns). All of the original data remains, but I think the data most relevant for us is in columns A thru I.
